

Huntington Drive Rehabilitation Project

The Huntington Drive Rehabilitation Project is scheduled to start on Monday, July 9th, 2012 and is scheduled to end on Tuesday, August 21st, 2012. This project will affect Eastbound Huntington Drive from St. Albans Road to West Drive.

This project consists of the installation of curbs, gutters, sidewalks, concrete paneled intersections, paving, striping and the installation of irrigation in the center median. During this project there will be traffic diversions, which will cause interruptions in traffic flow. If possible, it is recommended to use an alternate route during this time to avoid delays.

We are sorry for any inconvenience this may cause you. If you have any questions or concerns during this project, please contact Dean Werner - Public Works Inspector at (626) 300-0796.
